

ChurchPanel Mobile
It's easy, secure & intelligent for church community apps to be on Framework + Cognito. Extending the structure built with the **React** components, you'll address safety, and a lot of other things.

- 
How to Stop Smoking
 Quitting smoking prevents smoking-related illness, improves cardiovascular health, and improves fertility.
- 
Smoking
 Quitting the cigarette reduces the risk of death from heart disease, lung cancer, and other complications.
- 
Smoking
 Quitting the cigarette reduces the risk of death from heart disease, lung cancer, and other complications.

Spending

How much you've spent so far in each of your budget categories. Click on a category to see a breakdown of your spending in that category.

Category	Spending	% of Budget
Groceries	\$120	40%
Utilities	\$80	27%
Entertainment	\$50	17%
Transportation	\$30	10%
Savings	\$20	7%

The screenshot shows the 'Brewery' app interface. At the top, there's a title bar with the word 'Brewery' and a subtitle 'Three different ways to do it'. Below the subtitle is a text input field with the placeholder text 'Enter a link to a recipe or a brewery website'. The main content area contains three cards. The first card is titled 'Brewery 1' and 'Brewing', with the text 'Brewery 1: A simple recipe for a beer' and a link 'http://www.brewery1.com'. The second card is titled 'Brewery 2' and 'Brewing', with the text 'Brewery 2: A more complex recipe for a beer' and a link 'http://www.brewery2.com'. The third card is titled 'Brewery 3' and 'Brewing', with the text 'Brewery 3: A recipe for a beer' and a link 'http://www.brewery3.com'.
